

The Indiana No Call list has been such a help, I no longer have to screen my calls because I know my evening is not going to be interrupted. Indiana does not charge for this service. I have family in Idaho who had to pay to get on the no-call list. All it takes is mentioning I am on the No Call list if someone does phone and I receive an apology and they don't call back. The Federal Law is not respected like the Indiana one is from comments I have received from various friends around the country who still receive calls even though they are on the Federal List.
